

Why Petit Lady?

Non-invasive, non-surgical procedure
No bleeding, No pain, No scarring

Questions?

How comfortable is the treatment?

The Petit Lady is a pain free procedure that most women find quick and easy.

How long is the downtime?

After your procedure, you may continue with your normal life without discomfort or medication. You will notice minimal & no change to your secretion after the treatment. Sexual activity is possible as soon as 24 hours after the treatment.

Is the procedure fast?

The treatment is done in the office and one session is as short as 5 – 10 minutes. Your physician will schedule your treatment except your menstruation period.

How many treatment will I need?

During your consultation, you will discuss your treatment goals with your physician. From this information, your physician will determine the amount of treatments needed to reach your goals. In general, 3 sessions are recommended with 2 week intervals in-between. After the first treatment you will start to see the results.

Petit Lady

ACTION II

360° Solution for Feminine Rejuvenation

What is the PETIT LADY?

360 ° Vaginal Tightening with Action II

Petit Lady™ encompasses non-surgical procedures for vaginal tightening or atrophic vaginitis caused by childbirth, aging and surgery. Secondly, it rejuvenates the vulva for a more youthful look.

This gentle treatment remodels collagen and tightens tissue. Treating the inner walls of the vagina and rejuvenating the vulva can recreate a younger look and feel.

The ACTION II aesthetic intervention offers a safe non-invasive alternative to improve looks and function.

- ▶ The gentlest ablation and collagen remodeling with the unique Dual Pass Technique
- ▶ Tightening the vaginal canal achieves a younger and healthier vaginal state
- ▶ Vulvar rejuvenation can deliver a more youthful look

Superior Satisfaction

Technology advancements have made vaginal alterations normal and accessible, solutions such as Petit Lady can positively impact your life.

After your treatments you will notice an improved satisfaction rate and enhanced self confidence. The pleasant rejuvenation enhances the look and shape of your labia for a younger, more appealing look.

- ▶ Rejuvenation of the pigmented vulva
- ▶ Improve the natural, silky texture and pink color
- ▶ Pain free procedure: No anesthetic needed
- ▶ A no-downtime procedure for active lifestyles
- ▶ Revive sensations and tighten vaginal wall

Ask Your Physician About

- Vaginal and vestibule tightening
- Reduce vaginal atrophy
- Enhance the appearance of pigmented vulva
- Improve post-delivery vaginal alterations
- Improve stress urinary incontinence
- Normalize discharge
- Reduce burning sensation, itching etc

Results You Can Feel

Vaginal Tightening

Non-surgical approach through the vaginal canal with Petit handpiece provides vaginal rejuvenation through a thermal tissue effect which tightens and helps to rebuild the anterior vaginal wall.

Laser energy gently targets the superficial layer of vaginal mucosa, targeting deep into the dermis to stimulate collagen with dual pass technology to rejuvenate your elasticity and function.

Stress Urinary Incontinence

If you experience involuntary release of urine, especially when you cough, sneeze, or laugh, Petit Lady may be your solution.

Petit lady promotes collagen remodeling and the synthesis of new collagen fibers in the region of anterior vaginal wall, providing greater support to the bladder.

Results with Enhanced Safety

Petit lady uses the Er:YAG laser which delicately treats vaginal tissue. In comparison with the CO2 laser, Er:YAG is unlikely to cause tissue necrosis or carbonization for an overall safer and gentler treatment.
