

## Reduce the Redness

Vascular lesions such as birthmarks, rosacea, spider veins, varicose veins, and telangiectasias arise from a wide range of natural and environmental sources including photodamage, genetic makeup, and the natural aging process. They can vary in size, shape, and prevalence in a given area.

Clarity is proven to reduce redness.

## FAQs

### WHAT WILL HAPPEN AFTER THE TREATMENT?

There is little to no down-time. You should be able to return to normal activities and wear makeup. Some veins may immediately disappear while others will take time to be broken down and removed by your body.

### WILL IT BE PAINFUL?

It depends on the patient and condition being treated. Your physician will work with you to ensure the treatment is comfortable.

### HOW LONG DOES THE TREATMENT TAKE?

The treatment could take only 2 minutes, or more, it depends on the size of the area. For example, the treatment of a single vein on a cheek or nose, may only take 2 minutes, whereas a back will take closer to 10 minutes.

## What to Expect

Clarity goes deep to treat visible veins, eliminating them permanently.

The laser beam travels through the skin and is absorbed by the blood vessel and converted to heat.

The heat destroys the blood vessel by heating, which shrinks and eliminates visible vessel.

Vessel visibility is gone or greatly reduced in appearance.

*"I feel more confident now, I don't have to wear makeup every time I leave the house, nor am I embarrassed by looking flushed all the time."*
